

A wooden desk with two pencils and a book. One pencil is orange and the other is blue. A dark grey book is lying on the desk. The background is a light-colored wood grain.

# Extra Support

**What will I learn about?** Extra Core and Learning Support are available for students who choose to do one less GCSE. Extra Core is free of charge and provides additional lessons in Maths, English and Science. Specialist teachers reinforce essential skills needed to progress in these subjects. Learning Support is charged for and is arranged with our SENCo. Students can have a maximum of five one hour lessons over a fortnight, in small-groups no larger than 4 or private sessions if that is preferred. These sessions are designed to support their literacy, mathematical and learning skills.

**Great for:** Students who need a little more support with their learning or for whom a more reduced GCSE program is appropriate.

**Student view:** *“Learning support has really helped me. The teachers are really friendly and help me go through the things we have learned in lessons making sure that I really understand them”*
